

## **The Nurturing Nest Family Child Care Lead Poison Notification**

Dear Parent,

As you are aware, Lead Poisoning is a potential health hazard to children. Because this is such a serious problem, the State of New York recommends that ALL children under the age of six years old be screened for Lead Poisoning.

Like all other Registered and Licensed Family Child Care Providers in New York State, I am required by law to request that your child be screened for Lead Poisoning. If your child has been screened, I need to have verification on file. If not, please plan to have a screening done as soon as possible.

Further information regarding Lead Poisoning is available through your health care provider or the Onondaga County Department of Health Lead Poisoning Control Program at 435-3271.

Remember that our goal is to keep children healthy. The law is not intended to keep children out of daycare, but to take that extra step toward ensuring Good Health.

Julie Glanton  
The Nurturing Nest

---

I have read the above information and I am aware that it is important to have my child screened for Lead Poisoning.
